

Mandatory AMBRY Health Screening

This year, we will be implementing a Covid screening process from Ambry Genetics. Those of you in the Hillsborough City School District (HCSD) are familiar with this portal.

Parents will log into the portal the morning of HLL activities and answer symptom screening questions before receiving a green badge status that will be required for practices/games. A red badge will be issued if symptoms are positive, or you have been exposed and must quarantine. The badge can be displayed on a phone or printed out. If a green badge status cannot be verified, we will be unable to allow the player to participate. We will also be doing on field temperature checks. HCSD parents can use their existing profile and if they have received the green badge for school that day, that badge can be reused if it has the current date. To be clear, current HCSD parents that are already registered for Ambry do NOT need to register again. This is mandatory for participation.

Please create your profile as soon as possible to ensure a smooth first day of practice. Sign up each player with their own account and with their own unique email address at <https://hcsd.students.care.ambrygen.com/#/student/sign-up> prior to their first in-person HLL day.

A few notes:

Each player must have their own unique email address. Select the following

School Information

Student ID (optional)

School city and state *

Your child's school *

For those registering more than one child, you will have to do the process for each unique player/email address. It may help to clear cache/history on your browser if you encounter issues. You can use the same parent email for all players. You will get communications from Ambry to this address.

After registering, log in to perform screening. We recommend bookmarking this site. After receiving your badge, we recommend screenshotting each badge and saving it to pictures ahead of time in order to avoid cell signal issues at field locations. Each day before game/practice, parent should log into CARE for each player at <http://students.care.ambrygen.com/> Because we are leveraging HCSD, you will be receiving a daily reminder to login. For HLL purposes, only the date of play is required for login.

Further instructions and FAQ can be found at:
